

Dosimeter-radiometer MKS-18 alpha, beta, X-ray, gamma and neutron radiation

Purpose

Portable multifunctional professional device is intended to measure (depending on the set of radiation detectors):

- ambient dose equivalent rate and $H^*(10)$ and ambient dose equivalent $H^*(10)$ of continuous gamma-radiation;
- ambient dose equivalent rate and $H^*(10)$ and ambient dose equivalent $H^*(10)$ of X-ray and gamma-radiation (including pulse);
- ambient dose equivalent rate and $H^*(10)$ and ambient dose equivalent $H^*(10)$ of neutron-radiation;
- flux density of alpha-, beta-, gamma-radiation.

Features:

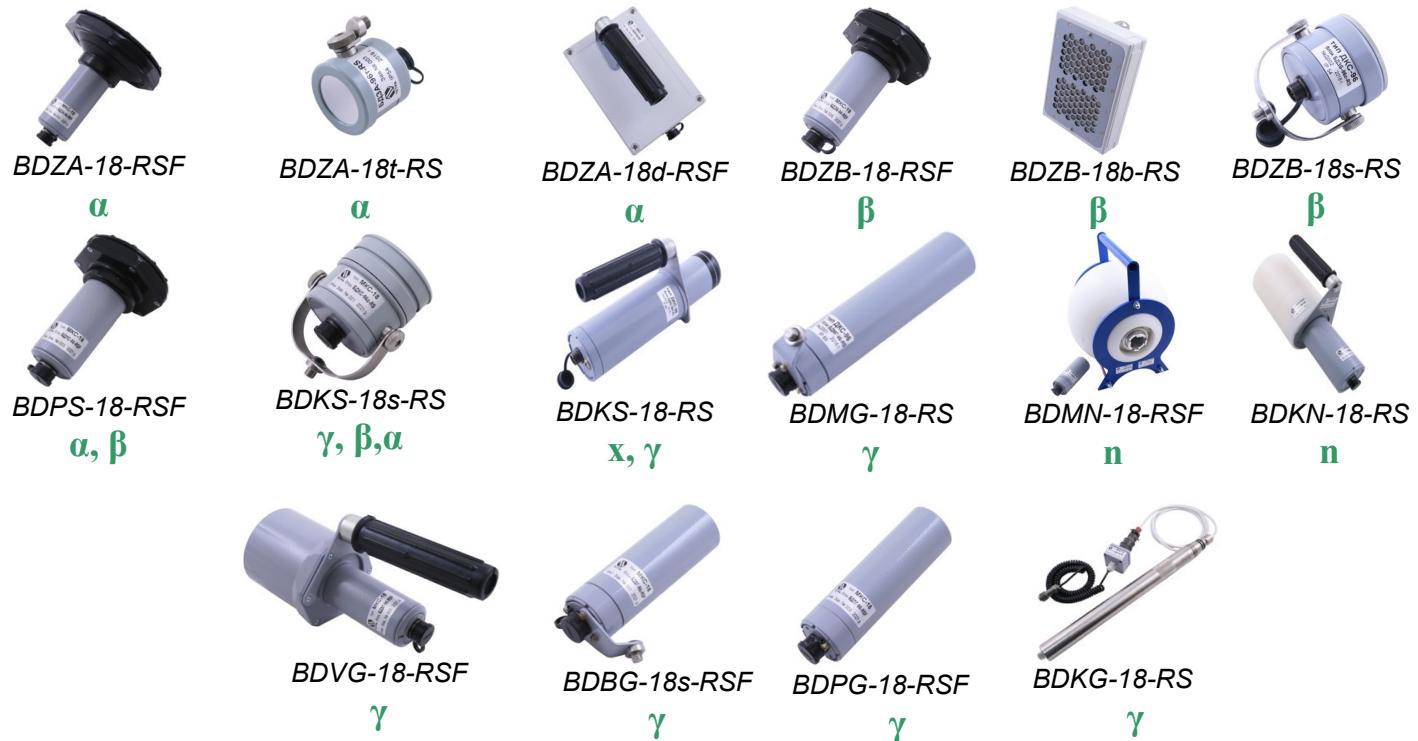

- consists of radiation detector (depending on the type of ionization radiation) and one of consoles (at the Customer's choice): UIK-09 (a metal case, built-in accumulator block), UIK-10 (a plastic case, built-in accumulator block, OLED-display), UIK-11 (a plastic case, built-in accumulator block, LCD-display).
- console UIK-09 (at the Customer's choice) can be equipped with an embedded detector BDBG-201-RS, which expands the functionality;
- automatic detection of the type of the connected detector and activation of measurement modes for this type of detector;
- a possibility to select the measurement algorithm and set the threshold setting for each measurement mode;
- audible and visual alarms of exceeding the limits during measurements;
- simplicity and reliability, the ability to equip with additional detector;
- a short time of measurement and fast automatic adaption to change in radiation situation;
- unique algorithms of search, localization of sources and fields of ionization radiation;
- work in a wide range of temperatures in the field, carrying logs of wells and boreholes
- radiation survey of the area with geo-references, stored in the nonvolatile memory of up to 4000 measurement results with possibility of transfer to PC and imposition to electronic maps (additional option);
- embedded communication module Bluetooth which provides data exchange between console and detector by auxiliary device MOB-01 (additional option).
